

Nutrient Advisors consults the livestock industry across the Midwest in the area of environmental compliance, permitting, and manure-nutrient management. Our focus is to save our clients a lot of time, provide them with peace of mind that their operations are in compliance, and maximizing returns from their manure resources by strategically utilizing nutrients on their own farms or by developing sales programs for their crop producing neighbors. Our agronomic approach is what sets us apart and allows us to make environmental compliance, agronomics, and economics work together to achieve the highest yields, most profit, and the cleanest water and air.

Position Title: *Agricultural Data Specialist*

Department: Land Application

Position Definition: This is a professional office position that will compile and analyze data provided by account managers and other professional sources to produce Nutrient Management Plans and other livestock operation permitting applications for clients in a timely manner as required by regulatory agencies.
