Nutrient Advisors consults the livestock industry across the Midwest in the area of environmental compliance, permitting, and manure-nutrient management. Our focus is to save our clients a lot of time, provide them with peace of mind that their operations are in compliance, and maximizing returns from their manure resources by strategically utilizing nutrients on their own farms or by developing sales programs for their crop producing neighbors. Our agronomic approach is what sets us apart and allows us to make environmental compliance, agronomics, and economics work together to achieve the highest yields, most profit, and the cleanest water and air.

Position Title: ***Field Sampling Technician***

Employment Status: Full-Time / Part-Time

Position Definition & Duties: This position is responsible for collecting, organizing, and managing data collected from designated fields. This position will be seasonally outdoors: sampling, mapping, and assessing fields between harvest and applications of manures. This position will utilize GPS equipment, hydraulic and manual soil sampling equipment, and GIS software system extensively.

Position Qualifications

- Associate or bachelor's degree or equivalent experience and a general understanding of agriculture is preferred.
- Knowledge and experience of GIS systems and software is preferred.
- Proficient with county plat books and legal descriptions.
- Excellent communication and interpersonal skills.
- Extremely organized and detail-oriented multitasker who works well in a fast-paced environment.
- Good problem-solving skills, ability to meet deadlines, and adapt to changing priorities.
- Honesty and integrity are a must, and the highest level of confidentiality is essential.
- Always represent a positive visual and verbal image: collared shirt, clean equipment, etc.
